NULL-MR3 R00 RS232C Generic Null-Modem Cable

Compatible with FarSync T1U, T2U, T4U, T2P and T4P cards

Cables using this pinout are known as Null-Modem or Crossover cables, they can be used as a low cost way to replace a pair of synchronous modems or a synchronous modem eliminator as long as the device at one end of the cable can product the clocks. The FarSync T1U, T2U, T4U, T2P and T4P cards can be configured to generate the required clock signals on pins 15 and 17.

Converts the FarSync cards DTE presentation to a DCE presentation.

25 Pin	D type female	25	Pin D type female
